

Mission Statement

Our mission is to facilitate the revolution in how we design our buildings and entire communities; smart grids, energy & water conservation, effective resource management, and by integrating a wide portfolio of leading technologies to harness renewable energy and convert waste into higher value products, ultimately leading to Improved environmental and community health.

About Neutopia

Neutopia isn't just a company; we are a consortium of Green Project Developers merging the world's best in Green Technologies with Social Enterprise: our business model is to Transform Efficiency Problems into Social Solutions™ by helping communities to develop Green Plans and then reinvesting our profits right back into Community Enhancement projects, at home and around the world...we are the world's first **'pay-it-forward'** energy & infrastructure company!

Neutopia's Green Teams

Our portfolio of ecoSOLUTIONS was created by evaluating 100's of 'green' technologies around the world; from the latest nanotechnologies to energy efficient lighting & window systems, sensors, energy-smart HVAC, solar, geothermal, wind, right through to organic conversion systems for biogas and next gen waste management with forest and agri-bioproducts manufacturing, including the emerging algae fuel & co-product revolution.

...Discover the opportunities!!

Ambassador Program

Why volunteer when you can learn, travel the world and get paid! We are ready to start training Neutopia Ambassadors; our green teams who will be trained in eco-consulting and identifying green project opportunities.

Work on projects with Neutopia's team of experts led by Renewable Energy project developers and award-winning LEED certified Energy Efficiency & Green Building specialists, preparing green project proposals and earning great money while also accumulating **'Neu-Change'**; *Neutopia credits for international travel to work on Neutopia projects in countries of your choice!*

"Neutopia's Ambassador Program makes it easy to convert sustainability problems into project opportunities and link them with the right eco-Solutions!"

- Ambassadors will be trained on business development, marketing, promotions, sales, eco-project management and proposals, and working on Green buildings and ecoPARK projects
- Sales are made easy with Neutopia's Lean Entrepreneurship and industry changing Green Project Proposal template; we offer Complete Energy Management Services with a comprehensive suite of technologies for building efficiency, renewable energy, waste reduction, recycling, water conservation, even retail electricity & gas programs so there's an opportunity waiting at every doorstep; residential, commercial, farms, factories or hospitality industry! Our turn-key solutions and industry leading E&C green partners are about to change the face of Clean-tech around the world!

...And that's only the mainstream stuff!!

About Yonsei University EIC

EIC is an international school bringing together students from diverse cultural backgrounds preparing them for global leadership in varied disciplines. All classes taught in English, students can study Management & Social Sciences earning bachelor's degrees in Business, Economics, Political

Science and Culture. Korea's explosive growth is a result of global innovation, international relations, technology, and strong emphasis on family relations and education. It is well known for delicious food and a safe environment (*street vendors don't even take home or lock up their products at night!*).

Close professor-student relationships with small classes, and students assigned to at least one professor as a mentor, counsellor and friend for guidance, helps students obtain the best care & direction during studies.

In addition to Korea's world-class skating, swimming, & soccer, EIC has

many nearby ski resorts, lakes, mountain trails, beautiful beaches & much more!

Inquire ASAP Deadline is May 17 for First 3 Students 2013 Admission!!

Neutopia is a Social Benefit Company
What's most exciting about Neutopia? *We are the world's first Social Benefit Energy & Infrastructure company.* Our unique & disruptive business model is a blueprint that may inspire a paradigm shift in global energy & infrastructure development: it enables us to devote 80-100% of our profits to build community enhancement projects at home and around the world to make our communities stronger and self-sustainable. We are on a Mission to Give. To Inspire. To Empower. This is Neutopia.

It's made possible because *we don't just sell these technologies to others but because we are also developing our own ecoPARKS which makes our business self-sustainable.*

Our Social Benefit model will benefit each community for decades, and community advisors will decide how best to utilize our profits within THEIR community OR to bring the gift of clean water, renewable energy and agricultural technologies to empower communities in regions of greater suffering.

*Nothing is more powerful than an idea
whose time has come!*

"Transforming sustainability problems into social solutions isn't just an idea; it's our responsibility."
