Neutopia Community Sustainability Programs

A unique Blueprint for First Nations & Métis of Ontario

re: Deadline for **Information Session** or **Community Program**

We only need the Letter of Interest attached here for easy signing, take picture on cell phone or scan and email to ERS@Neutopia.ca

Etobicoke, Ontario
March 11, 2019

It is with great pride that Neutopia has now launched a completely New and Unique Sustainability Program to First Nations and Métis of Ontario (may come at NO COST via grants).

- Can choose the Free Information Session or the Full Program
- Can be combined with any other program or initiative
- Provides blueprint for a Sustainable Community
- Results in Immediate Projects
- Includes FREE Education and Job Training Program
- Can Lead to Immediate and Permanent Job Creation
 - (completely unrelated to any other jobs that exist)

Neutopia Sustainable Community Program:

- No Cost for Information session or Program
- Does NOT interfere with or replace any existing Plan or Program already in motion or being planned for the future.
- Some of the information can be shared and used to help with other projects you may be considering, especially where energy is concerned (but it does not replace or change anything)

It's a completely stand-alone and unique program that all First Nations and Métis communities can have for free.

About Neutopia

Founded in 2008, Neutopia ecoSolutions Inc. was established to be the world's first Social Impact Community Sustainability company. Often regarded as the "Indiana Jones" of energy, Neutopia is the company behind more than 350,000 km of travel worldwide to understand energy problems and the various solutions that exist. It is comprised of a global network of Project Scouts, Ambassadors, Educators, Building Specialists, Environmental Scientists, Project Integrators, and world-leading Technology and Engineering Firms with tens of thousands of projects completed.

Our focus is on Sustainable Living & Community Planning; Clean Energy, Building Efficiency, Water Conservation, Food supply, and socially responsible Waste Management

Robert W. Laporte
President & CEO
Neutopia ecoSolutions Inc.

An international speaker on Climate Change and energy solutions, Robert heads a team that has conducted studies on 100's of properties across Ontario and has presented special guest lectures at universities and colleges, international conferences, and his first company was the inspiration behind a documentary that aired across Canada on CBC. He is an experienced educator on sustainability issues and community readiness. Robert was the lead researcher behind many important initiatives including Ontario's first forestry supply competition for bio-energy, understanding the energy needs for Northern Ontario's Ring of Fire mining activities, and creating a network of ecoParks to help alleviate the strain of an aging electrical grid. He is leading a network of development projects that integrate Smart Energy solutions, IoT, and various cleantech solutions that will form the basis of his next documentary on Global Change and the future of Energy.

Note: all we need at this time is the interest of the Chief or a Community Leader and we will then send an information package for Council to review. Once they review and have time to discuss, a Band Council Resolution can be submitted. Or, the original Letter of Interest can even be terminated if Council decides it's not for them, at least we get the Letter of Interest in time for the November 13 deadline.

I welcome your interest and hope we can start a project with you as soon as possible.

Best regards,

Robert W. Laporte
President & CEO, Neutopia ecoSOLUTIONS Inc.

"Our entire business model, quite simply, is to find communities who complain about high costs and inefficiency, who want change, so we can help them reduce expenses by implementing a specific combination of eco-technologies to make it a truly 'smart community' and create the greatest savings possible. We essentially bring these eco-Solutions to them so we can re-invest our own profits to help change the world, one community and one project at a time."

- Robert W. Laporte, CEO of Neutopia
